

# Sentiment Analysis for Good Discussion

# DISCUSSION

**Would you want AI to censor songs on the radio for toxicity?  
Why or why not?**

- Why might people want to censor what songs get played on the radio?
- Why might it be useful to have an AI system do the censoring?
- Why might you not want the censorship?

Check out the slides from  
this [deck](#) to see why toxic  
songs might matter.

Look at the Math but you  
don't need to understand it.

# DISCUSSION

- Were there similarities between what the researchers found and what your class found in analyzing the sentiment of songs?

# DISCUSSION

- Would you want AI to decide if a song should be played on the radio or not?
  - How negative would be so negative it shouldn't be on the radio?
  - Who would decide this?
- What false positives and negatives might the AI system get?
- Who would be helped by this system?
- Who would be hurt?

## Exit ticket: Unit 5.03 - Discussion

Would you want AI deciding whether or not to censor a song based on its understanding of sentiment? Why or why not?
